**Software**

**Doc Expert**

Doc Expert is an intelligent document management software that enhances work productivity and accuracy by tracking the movement of every document and its storage location. Each document is assigned with a unique number and its movement is time-stamped to facilitate easy report generation for audit purposes.

**Logistic Expert**

A robust warehouse software, Logistic Expert is the essential tool for smart storage management. Besides item and location management, the Logistic Expert is suitable to handle various operational needs such as batch operations, lot tracking, stock reservation, kitting, cross-docking, and transfer to meet your business' unique needs. To have a cockpit view of the warehouse, management reports like activities log, stock rotation and inventory status can be easily customized and created.

**COMPACT**

The COMPACT mobile shelving system provides high density storage over a small area. Every bay is mounted on a mechanical rail system guided by a single rail. The COMPACT is easily configurable to use accessories such as drawers, pull-out referencing shelves and doors to meet your unique storage and application needs. With its flexibility and configurability, you can use the COMPACT for any document or general storage of goods and tools.

**ELETTRICO**

The ELECTRICO COMPACT is a unique system that allows you to drive heavy rows of shelving at just the push of a button. This is achieved through its independent motorised drive system that is controlled by a programmable logic controller (PLC). Instead of driving one row at a time, the ELECTRICO COMPACT's intelligent controller is able to move multiple rows in tandem. Other key safety features include:

- An emergency push button for every row
- Vertical System-Access light barrier
- Horizontal Cross Aisle light barrier

R-MAG

The R-MAG is a fully automated industrial storage vertical carousel with carrier payload capacities ranging from 180 kg to 500 kg. It is ideal for storing items such as tools and parts, production materials, work in progress and finished goods. Various carriers’ configurations are available to meet a wide range of storage, handling and security needs. This includes carriers with intermediate shelves, individually locking drawers and compartments.

The R-MAG is fully automated, industrial storage vertical carousel with carrier payload capacities ranging from 180 kg to 500 kg. It is ideal for storing items such as tools and parts, production materials, work in progress and finished goods. Various carriers’ configurations are available to meet a wide range of storage, handling and security needs. This includes carriers with intermediate shelves, individually locking drawers and compartments.

The ROTOFICE vertical carousel maximizes the use of available room height, minimizes the use of floor space, optimizes picking and storage operations which reduces operator fatigue and errors. It also boosts productivity with the use of management software and LED position light technology. Safety light barriers are deployed across the access aperture with strategically placed emergency push buttons for easy access in case of an emergency. For added security, biometric locks, built-in detectors and fire fighting systems can be installed to enhance warehouse security and reduce goods protection.

Flexible Carrier Configurations

Multi purpose carriers meet most general storage requirements.

Locked cabinet carriers provide extra security for stored goods.

Carriers with adjustable dividers for easy and flexible organization of stored goods.

Drawer carriers for secured and organized storage of small parts.

Bin carriers are ideal for systematic storage of small components.

Specifically designed for the pharmaceutical industry, the ROTOPHARM vertical carousel is ideal for the storage of medications and drugs in a temperature and humidity controlled environment. The ROTOPHARM vertical carousel series also offers a wide range of carriers configurations to meet the individual needs. Carriers can be customized to fit arch files, lateral folders and suspended pockets in pull-out hanging frames. Drawers can also be configured for storage of cards and media of various formats.
